

Setting up Composerize

```
sudo apt install npm
```

```
[Y/n]
```

```
npm install composerize -g
```

-g is the global install flag

<https://nodejs.org/en/blog/npm/npm-1-0-global-vs-local-installation/>

```
composerize docker run -d --name tinypin -p 3030:3000 -v "$(pwd)/data:/data" --restart=unless-stopped slynn1324/tinypin
```

```
version: '3.3'
```

```
services:
```

```
  tinypin:
```

```
    container_name: tinypin
```

```
    ports:
```

```
      - '3030:3000'
```

```
    volumes:
```

```
      - '/root/data:/data'
```

```
    restart: unless-stopped
```

```
    image: slynn1324/tinypin
```

```
composerize docker run -d=true -p=8180:80 -v=${DATA_PATH}:/data getpinry/pinry
```

```
version: '3.3'
```

```
services:
```

```
  pinry:
```

```
    ports:
```

```
      - '8180:80'
```

```
    volumes:
```

```
      - 'pinry:/data'
```

image: getpinry/pinry

volumes:

pinry
