

Dozzle

Dozzle is a simple, lightweight application that provides you with a web based interface to monitor your Docker container logs live. It doesn't store log information, it is for live monitoring of your container logs only.

- [Docker-Compose.yml](#)

Docker-Compose.yml

```
version: '2'
services:
  dozzle:
    image: amir20/dozzle:latest
    container_name: dozzle
    ports:
      - 8888:8080
    volumes:
      - /var/run/docker.sock:/var/run/docker.sock
```
