

Guacamole in Docker

- [Docker Compose](#)

Docker Compose

```
---
version: "2.1"
volumes:
  guacamoleconf:

services:
  guacamole:
    image: oznu/guacamole
    container_name: guacamole
    volumes:
      - guacamoleconf: /config
    ports:
      - 8585:8080 #edit 8585 as necessary for your setup
    restart: unless-stopped
```
