

# Increase File Size Uploads with .htaccess

Log in to Portainer

Go to your list of containers

Find your NextCloud container

Click the >\_ (Exec Console)

Run the following commands:

- apt update
- apt upgrade
- apt install nano
- nano .htaccess

Once you're editing .htaccess, copy and paste the following lines into the file:

```
php_value memory_limit 2G
php_value upload_max_filesize 16G
php_value post_max_size 16G
php_value max_input_time 3600
php_value max_execution_time 3600
```

You can add this to the top or the bottom of the file as you see fit.

These numbers can be adjusted to whatever you'd like your max filesize to be. Be sure to make the *post\_max\_size* a bit larger than the *upload\_max\_filesize*.

Save (CTRL+O)

Exit (CTRL+X)

Go back to your Portainer dashboard and restart the NextCloud container.
