Browser Extensions

If you'd like to install either extension they are available at:

- https://chrome.google.com/webstore/detail/jmhdcnmfkglikfjafdmdikoonedgijpa/
- https://addons.mozilla.org/it/firefox/addon/add-to-pinry/

Once you've added the extension, open it up and click "Options".

Enter your Pinry URL into the URL textbox:
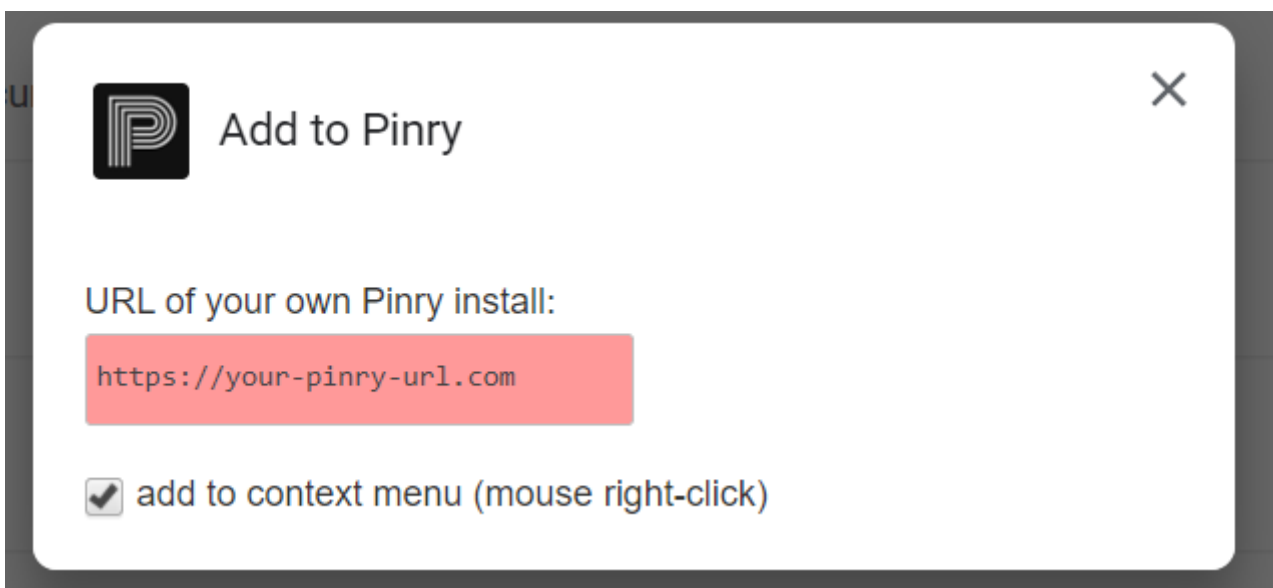

If your URL is correct/reachable, the box will be green instead of red. You can check the "context menu" option if you want additional functionality.

Click the X in the top right and you're set.

Now you can right click images and whatnot to save to your Pinry instance.

In your extension settings, you can also decide if you want the extension to work in Incognito mode as well.
