Raspberry Pi

Here are some Raspberry Pi scrips that might helpful

- [Check Temps](#)
- [Check RAM](#)

Check Temps

To check your Pi's current temp, use this command in the terminal:

```
vcgencmd measure_temp
```

Check RAM

If you have multiple Pis that you're using and moving around a lot, you might forget how much RAM your Pi has. If you forget, enter this in the terminal:

```
free -h
```
