

# Taisun

With Taisun you can manage your server all from the convenience of your web browser.

- [Docker-Compose.yml](#)

# Docker-Compose.yml

```
---
version: "2"
services:
  taisun:
    image: linuxserver/taisun
    container_name: taisun
    network_mode: bridge
    volumes:
      - /var/run/docker.sock:/var/run/docker.sock
    ports:
      - 3000:3000
    restart: unless-stopped
```
