

# Taisun

With Taisun you can manage your server all from the convenience of your web browser.

- [Docker-Compose.yml](#)

# Docker-Compose.yml

```
---  
version: "2"  
services:  
  taisun:  
    image: linuxserver/taisun  
    container_name: taisun  
    network_mode: bridge  
    volumes:  
      - /var/run/docker.sock:/var/run/docker.sock  
    ports:  
      - 3000:3000  
    restart: unless-stopped
```
